

PRECISION

SIDEWALK SALT AND SAND DROP SPREADER

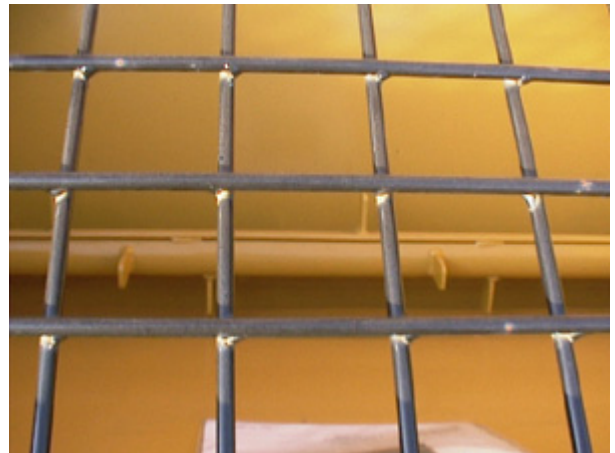

The Precision sidewalk salt and sand spreader is a three point hitch mounted hydraulically driven drop spreader for snow and ice control on sidewalks, driveways or footpaths.

Capacity-0.41 cu. yds.
Spread Width-43"
Overall Width-47"
Height-34.5"
Drive- Hydraulic Motor, 3gpm
Attachment-Cat. I 3pt.
Weight- 300 lbs.

The flow of material, sand, salt, mix, ice melter is controlled by the feed roller and the setting of the hand crank opening. Material is accurately metered regardless of the type of material being spread. This accurate spreading system saves a considerable amount of material while still maintaining adequate application rates.

A screen on the hopper breaks up large clumps of material. The hopper also has a hydraulically driven agitator to ensure material does not bridge. The bottom of the hopper holds the feed roller that meters the material.
