

SELF CONTAINED BRINE PRODUCTION/STORAGE UNIT

- Designed as a highly transportable production unit for anti-icing & dust suppression brine production.
- Self contained unit capable of producing 2800 gallons of brine/hour with separate storage tank as required.
- Watertight / wind tight insulated structure houses the complete production and storage installation.
- Integrated stainless steel salt loading chute with remote control cover
- Requires two 110V electrical connections and water source
- Small footprint 20'x8'x8' allows for installation in confined spaces
- Simple valve adjustment to control salinity or optional automatic salinity controller
- Brine maker and storage tanks available without enclosure

Brine making unit
1000 or 750 gal. polyethylene tanks
Steel containment frame with corrosion resistant coating. Stainless option.
Stainless and poly. plumbing components

Storage tank (2100 gal. shown) and salt loading chute (brine maker removed)

COMPLETE INSTALLATION
